WONJI INDUSTRY CO., LTD.

From everyday plastic packaging to large custom fitted covers

Reliable manufacturing.
Built around real-world needs.

Built for your application. Made to your specifications.

Based in Hwaseong, Gyeonggi-do, Korea, Wonji Industry manufactures and prints industrial plastic packaging. From pallet covers and general-purpose bags to food vacuum packaging and large covers, we tailor materials, thicknesses and dimensions to each application.

Manufactured in Korea

Custom sizes & manually fabricated fitted covers

Quality assurance & on-time delivery

Product Range at a Glance

Materials, thicknesses and fabrication methods are selected to suit product size and packaging needs.

Pallet Covers

Covers for entire boxes and palletized loads, made to suit the base dimensions and overall height.

Large Covers

Covers for machinery, equipment and large loads, manually fabricated to the required shape.

Bags & Tubing

Bags sealed at one end and tubing open at both ends, cut and sealed to suit the product.

Food Vacuum Packaging

Packaging using NY, PET and AL materials, configured for the contents and storage conditions.

OPP & PP Packaging

Clear product packaging. Packaging formats and printing requirements are discussed for each order.

PE & HDPE Packaging

LLDPE, HDPE and other materials selected by application, with flexibility, feel and thickness in mind.

Pallet Covers & Large Covers

Made to suit actual load dimensions and the conditions during storage and transport.

Reduces dust and contamination during transport and storage

Helps reduce direct contact with rain and snow

Ordering Specifications

Thickness × length × width × height

All measurements, including thickness, are stated in mm.

Measure the total height of the pallet and its load, and allow extra material for fitting and securing the cover.

Check the Pallet Base Size

T11: 1,100 × 1,100 mm

T12: 1,200 × 1,000 mm

1300 type: 1,300 × 1,100 mm

These dimensions refer to the pallet base. For outdoor storage, also check the opening seal, bottom securing method and drainage.

Manual Fabrication of Custom-Fit Covers

Large plastic covers are shaped to your requirements when standard sizes are not suitable.

Cutting · Large-scale sealing · Shape inspection

01 Required Dimensions

We review the cover specifications against the actual dimensions of your equipment and loads.

02 Material & Thickness

The film material and thickness are selected for the intended application and handling conditions.

03 Color Identification

Different colors, used on part or all of the cover, can help distinguish products and process stages.

From Flat Film to Box-Shaped Covers

Film is cut to the required size and joined using large sealing equipment. The cover is shaped manually, with corners and joints checked during fabrication. Available sizes and colors depend on the actual conditions of use.

General-Purpose & Food Packaging

Choose the right product by comparing the intended application and material properties.

Bags & Tubing

Parts, household items and long products

Bags are sealed at one end; tubing is open at both ends.
Specifications are stated as thickness × length × width.

Food Vacuum Packaging

Meat, seafood, nuts and dried foods

We review the NY, PET and AL material structure and packaging conditions.
Refrigerated or frozen storage and compatibility with the vacuum packaging machine are checked.

OPP & PP Packaging

Stationery, general goods, clothing and small items

Used for packaging that clearly displays the contents.
Adhesive areas, sealing methods and printing requirements are confirmed.

PE & HDPE Packaging

Industrial parts, cushioning, sorting and storage

LLDPE is soft and flexible, while HDPE is comparatively stiff.
Thickness is selected according to the contents' weight and handling conditions.

Production Facilities & Quality Control

Careful production from film preparation through converting, inspection and dispatch.

Film Production

Converting Equipment

Film Preparation by Color

Storage & Dispatch Preparation

Quality Assurance & On-Time Delivery

Pre-Production Review

We confirm the material, thickness, dimensions and quantity before production.

Dimension & Seal Checks

Finished products are checked for joint integrity and dimensional accuracy.

Scheduled Production & Dispatch

Confirmed delivery schedules are carefully managed through production and dispatch.

Manufactured in Korea

Film production and converting are carried out at our facilities in Korea.
